PROJECTS

React.js Projects :

- **Github Discover App** - I created this app in React.js where you can find Github users in real time response for which I use Fetch API to get data & many React features like Context, Reducer, fetch data, Param etc. Link: <https://githubfinder-shivam.netlify.app/>

JavaScript Projects :

- **To-Do List** - This To-Do List has multiple features like Add, Delete, Edit etc.
- **Weather App** - You can search live weather world wide by using this web app.
-

HTML & CSS Designing Projects :

- **Microsoft website Clone**
